Applied Programming Concepts

Incremental

1st version – system should work for 100 students, 10 instructors, and 1 admin. Students will be able register and view courses.

2nd version – admin should be able to control everything. To edit courses, users and schedules. The instructor will be able to search courses and see the class list.

3rd version – the system should have multiple semesters, print – out of the schedules for students and admins.

Final version – a scheduling system to allow students, instructors, and admin to add courses, search courses, and print schedules.
